

Updating thousands of records – Dataset and Dataflow

1. Let us assume there are thousands of records and we need to set status of these cases to “Hard Closed”

The screenshot shows the Pega Dev Studio interface with a table of Loan Process instances. The table has columns for ID#, Short description, Updated on, and Updated by. The instances are listed in descending order of the 'Updated on' date, starting from 9/11/2026 9:41 AM down to 8/24/2026 2:20 AM. All instances are of type 'Loan Process' and were updated by 'anand santhi kiran'.

ID#	Short description	Updated on	Updated by
L-4014	Loan Process	9/11/2026 9:41 AM	anand santhi kiran
L-4013	Loan Process	9/11/2026 9:38 AM	anand santhi kiran
L-4012	Loan Process	9/11/2026 9:36 AM	anand santhi kiran
L-4011	Loan Process	9/11/2026 9:34 AM	anand santhi kiran
L-4010	Loan Process	9/11/2026 9:19 AM	anand santhi kiran
L-4009	Loan Process	9/11/2026 9:17 AM	anand santhi kiran
L-4008	Loan Process	9/11/2026 9:15 AM	anand santhi kiran
L-4007	Loan Process	9/11/2026 9:14 AM	anand santhi kiran
L-4006	Loan Process	9/11/2026 9:05 AM	anand santhi kiran
L-4005	Loan Process	9/11/2026 8:52 AM	anand santhi kiran
L-4004	Loan Process	9/11/2026 8:50 AM	anand santhi kiran
L-4003	Loan Process	9/11/2026 8:50 AM	anand santhi kiran
L-4002	Loan Process	9/11/2026 8:48 AM	anand santhi kiran
L-4001	Loan Process	9/11/2026 8:46 AM	anand santhi kiran
L-3013	Loan Process	8/24/2026 2:42 AM	anand santhi kiran
L-3012	Loan Process	8/24/2026 2:37 AM	anand santhi kiran
L-3011	Loan Process	8/24/2026 2:35 AM	anand santhi kiran
L-3010	Loan Process	8/24/2026 2:34 AM	anand santhi kiran
L-3009	Loan Process	8/24/2026 2:31 AM	anand santhi kiran
L-3008	Loan Process	8/24/2026 2:30 AM	anand santhi kiran
L-3007	Loan Process	8/24/2026 2:28 AM	anand santhi kiran
L-3006	Loan Process	8/24/2026 2:26 AM	anand santhi kiran
L-3005	Loan Process	8/24/2026 2:25 AM	anand santhi kiran
L-3004	Loan Process	8/24/2026 2:23 AM	anand santhi kiran
L-3003	Loan Process	8/24/2026 2:22 AM	anand santhi kiran
L-3002	Loan Process	8/24/2026 2:20 AM	anand santhi kiran
L-3001	Loan Process	8/24/2026 2:20 AM	anand santhi kiran

The screenshot shows the Pega Dev Studio interface with the details of a specific Loan Process case (L-4002). The case is in the 'SaveAndRetrieve' stage. The 'To do' list shows a task 'SaveAndRetrieve' with a 'Go' button. The 'Case ID' is L-4002. The case is marked as 'NEW' and was created and updated by 'anand santhi kiran' 6 days ago.

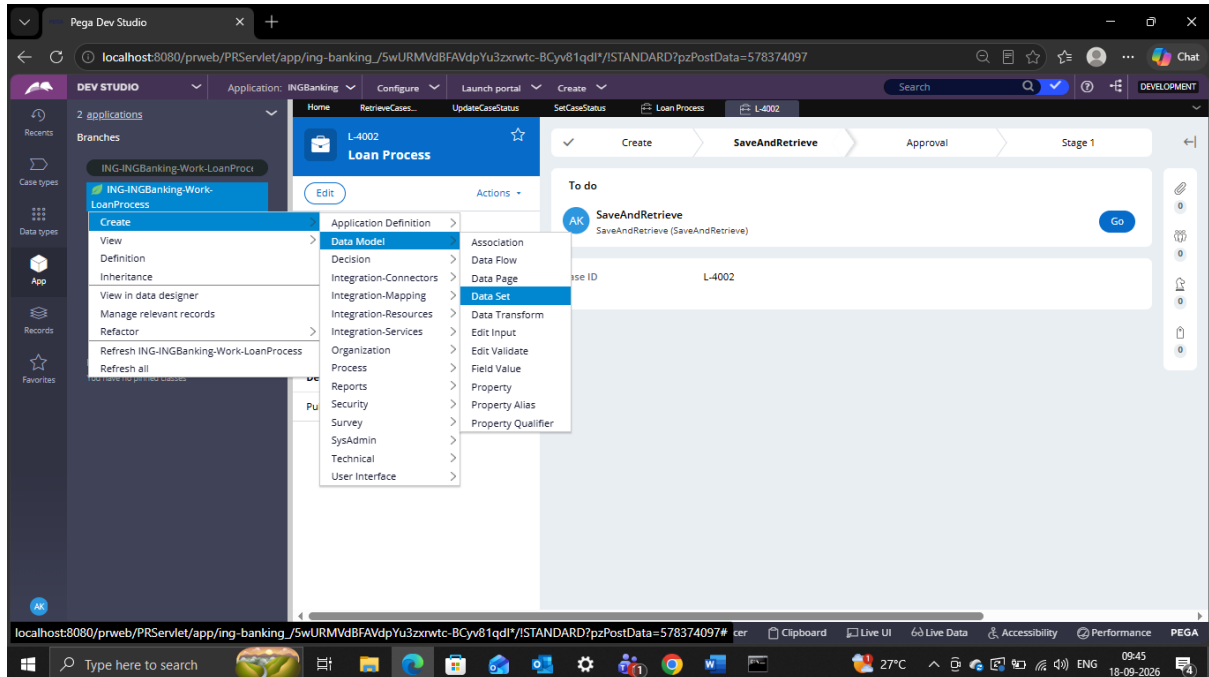

Case Details:

- Case ID:** L-4002
- Status:** NEW
- Created:** anand santhi kiran 6 days ago
- Updated:** anand santhi kiran 6 days ago

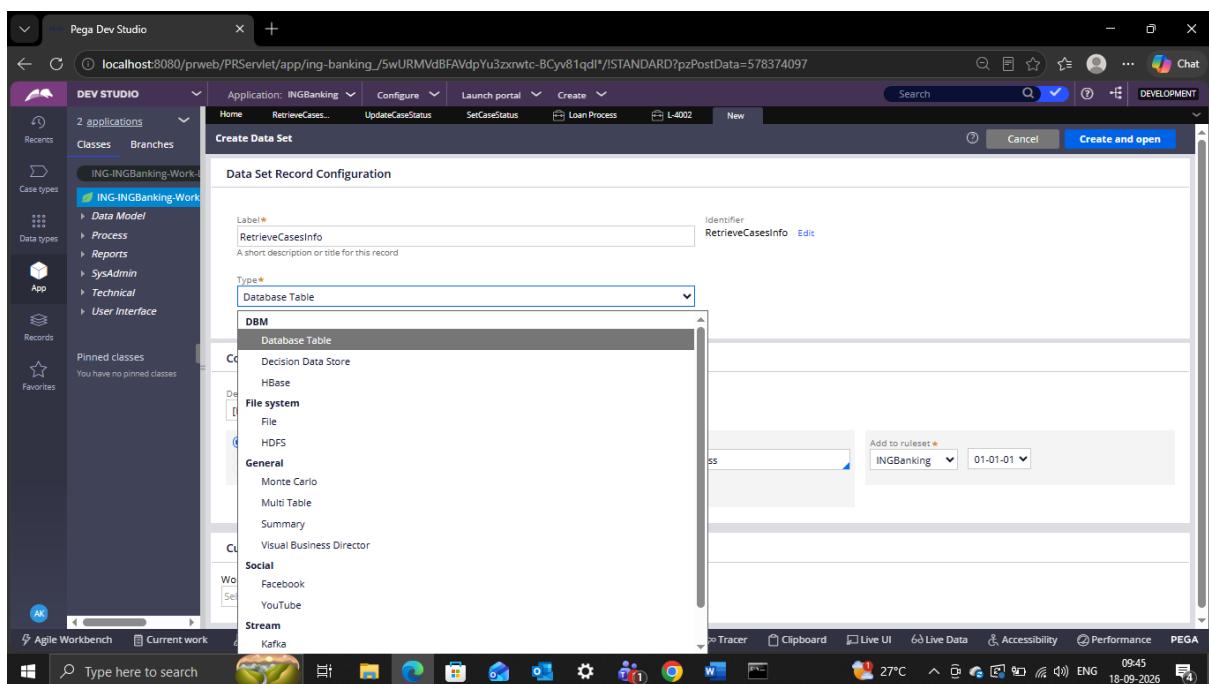

Actions:

- SaveAndRetrieve:** SaveAndRetrieve (SaveAndRetrieve) [Go]

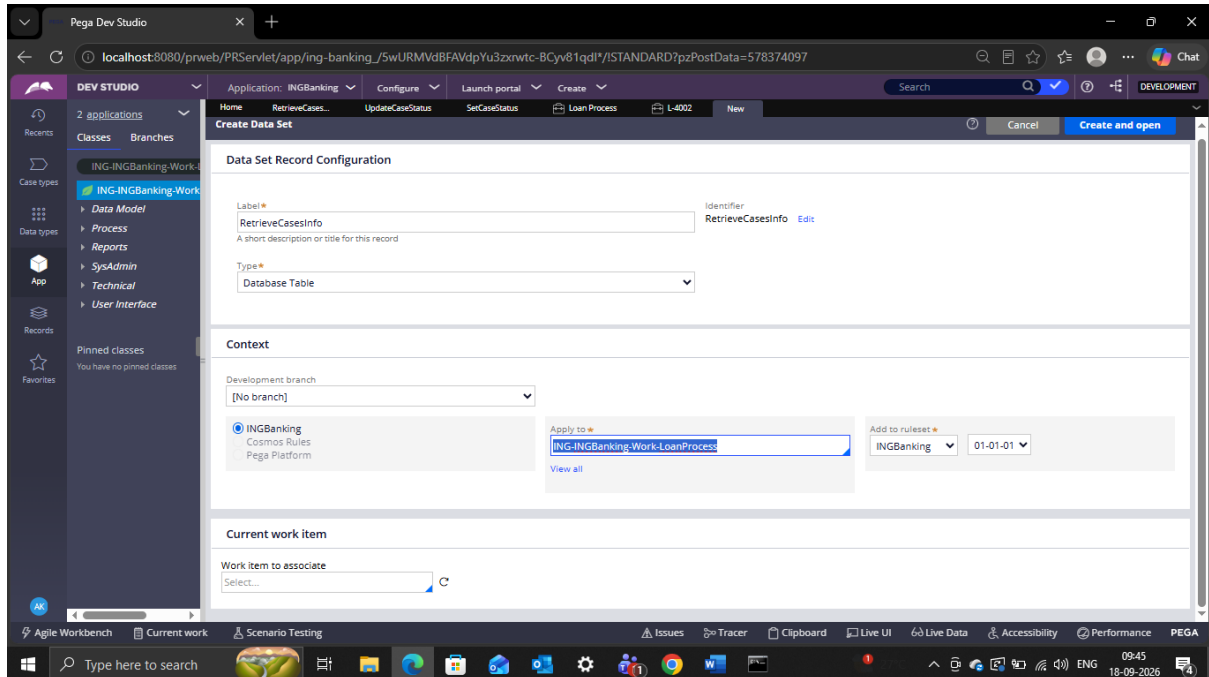

2. Create Dataset from Datamodel category

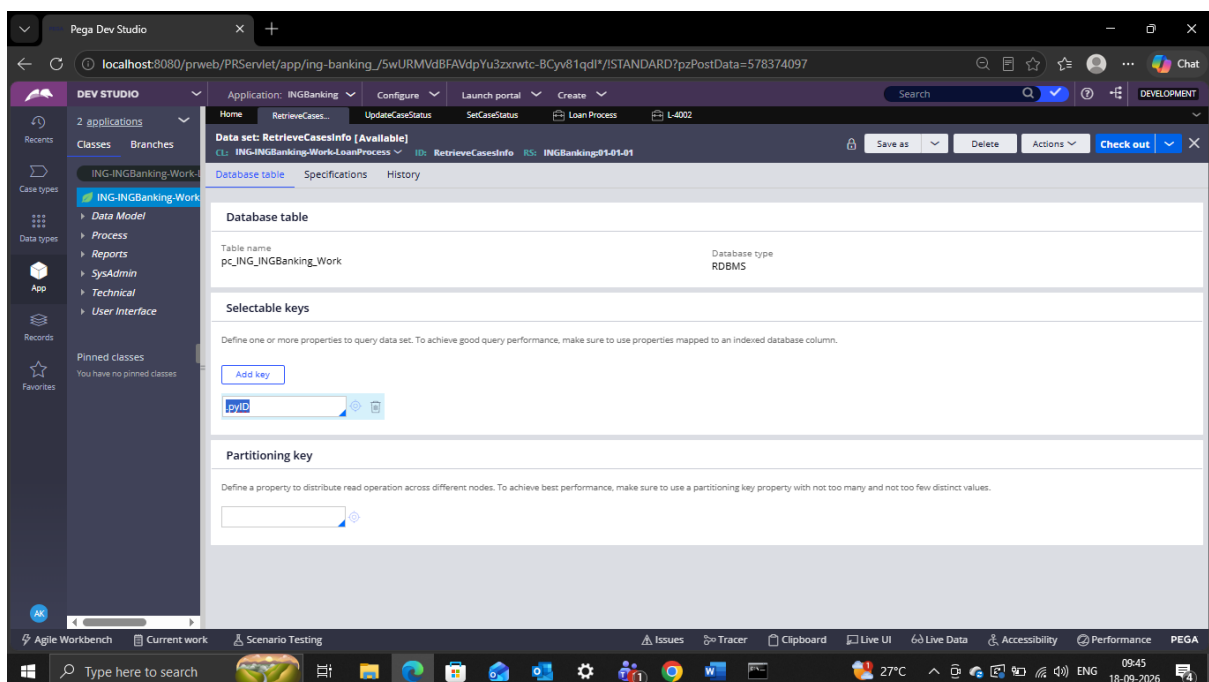

3. Select type as Database Table

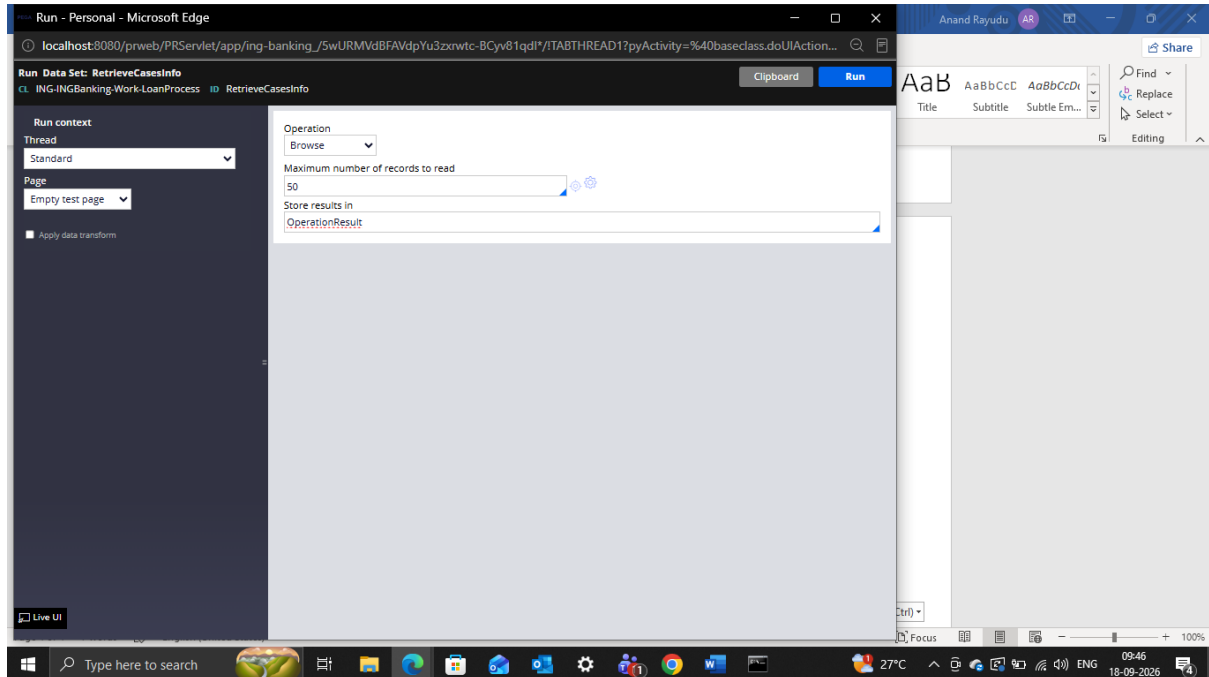

4. Select the appropriate class

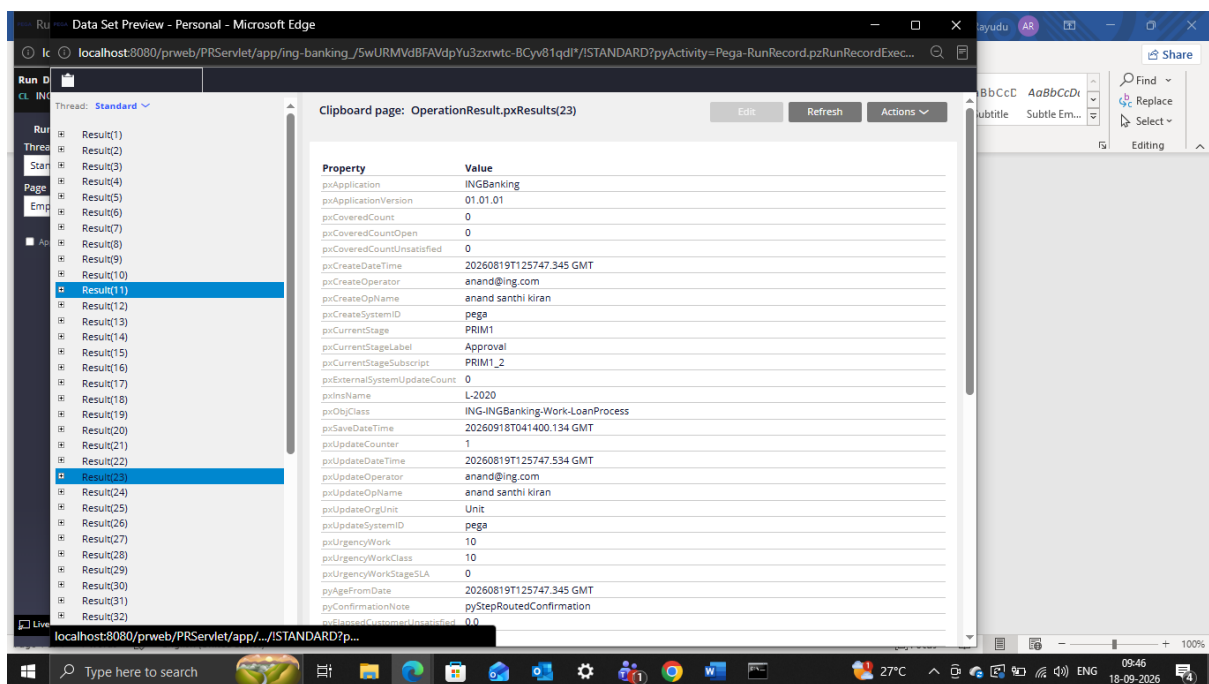

5. Add the "pyID" as key

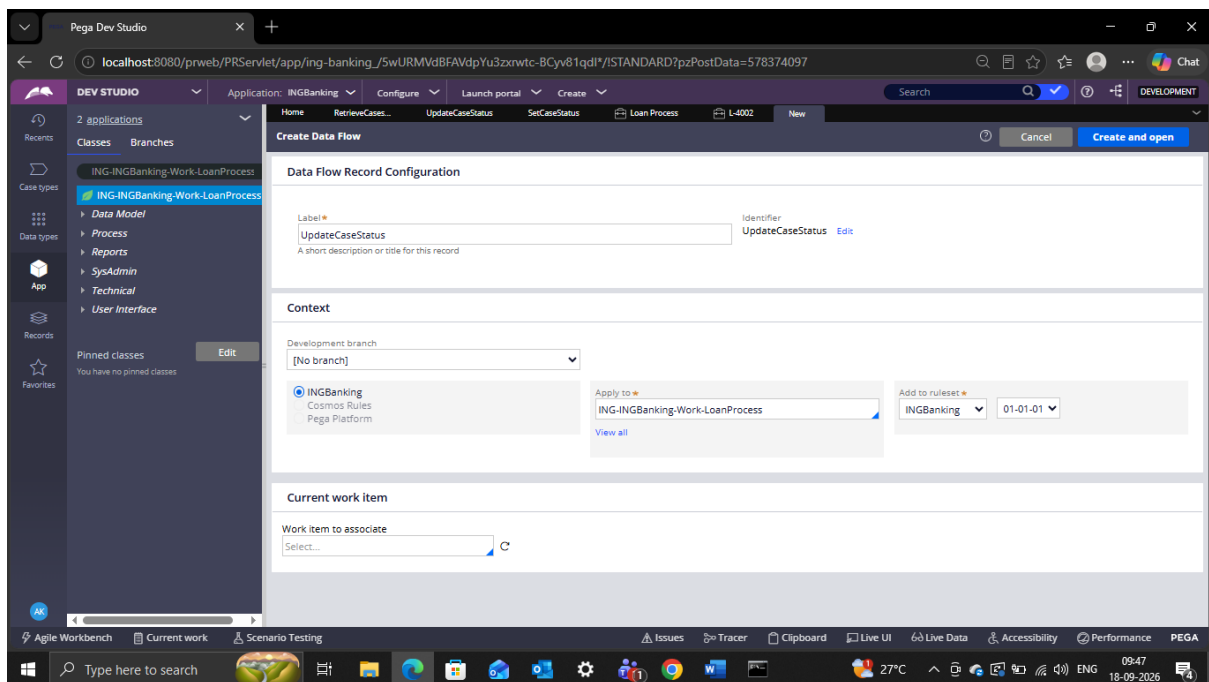

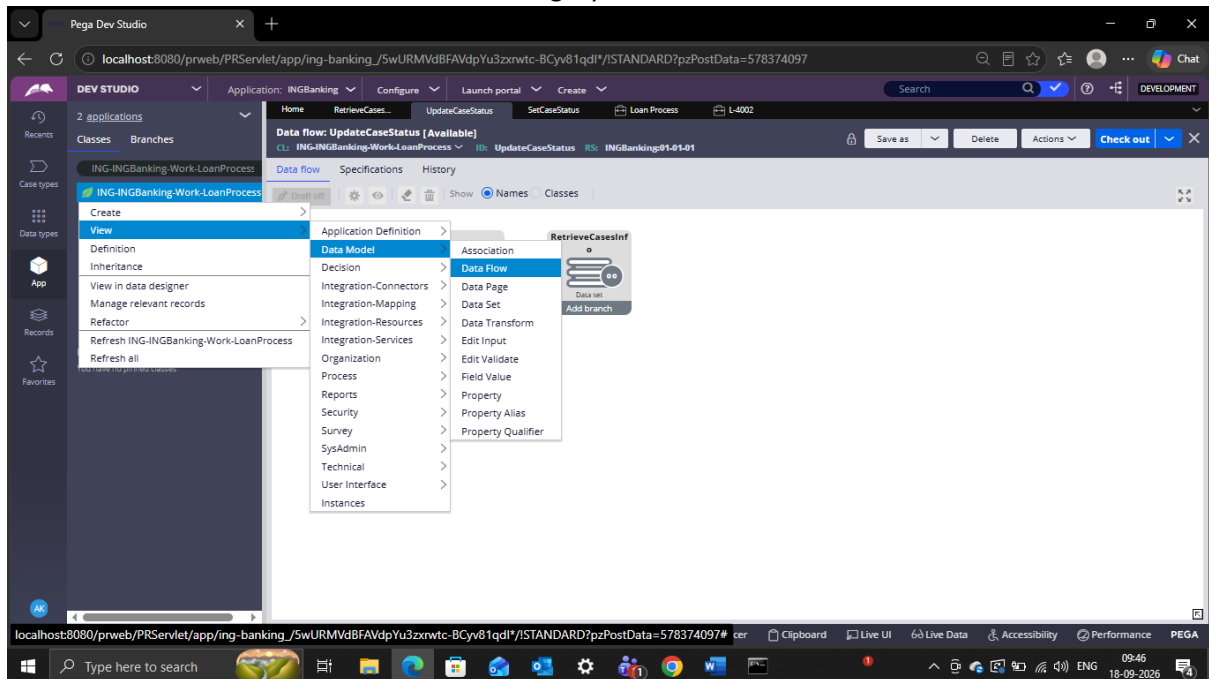

6. Now run the dataset and select browse operation

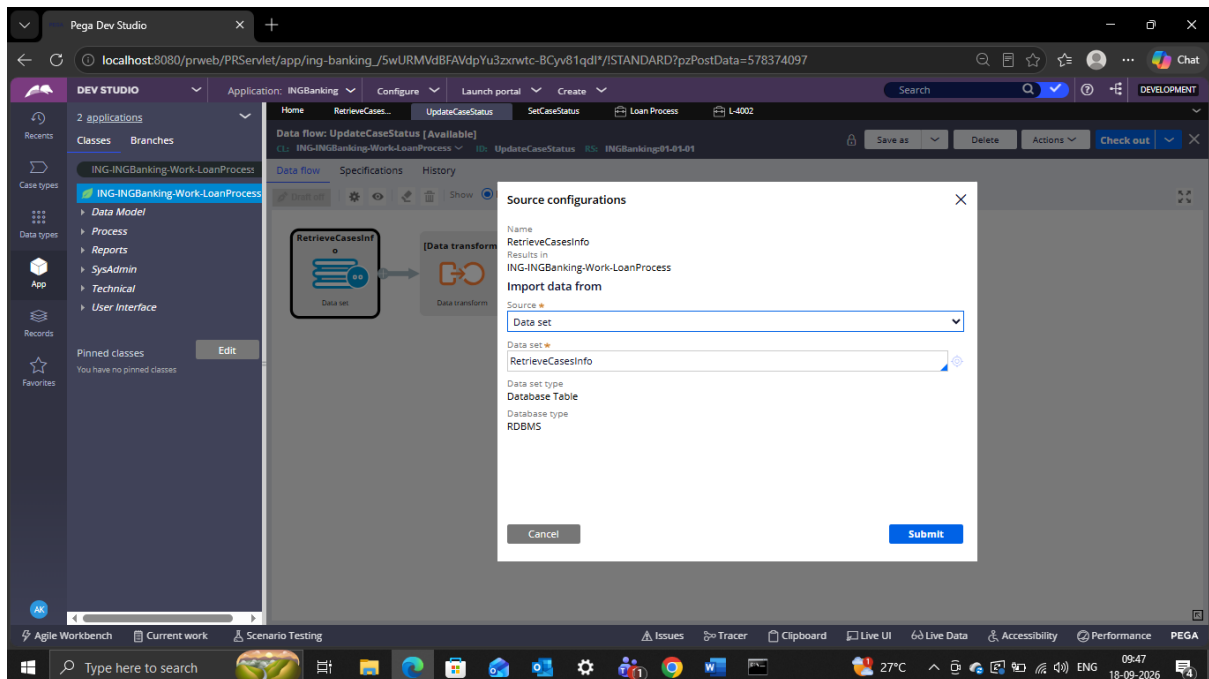

7. We can see all the results in the pagelist

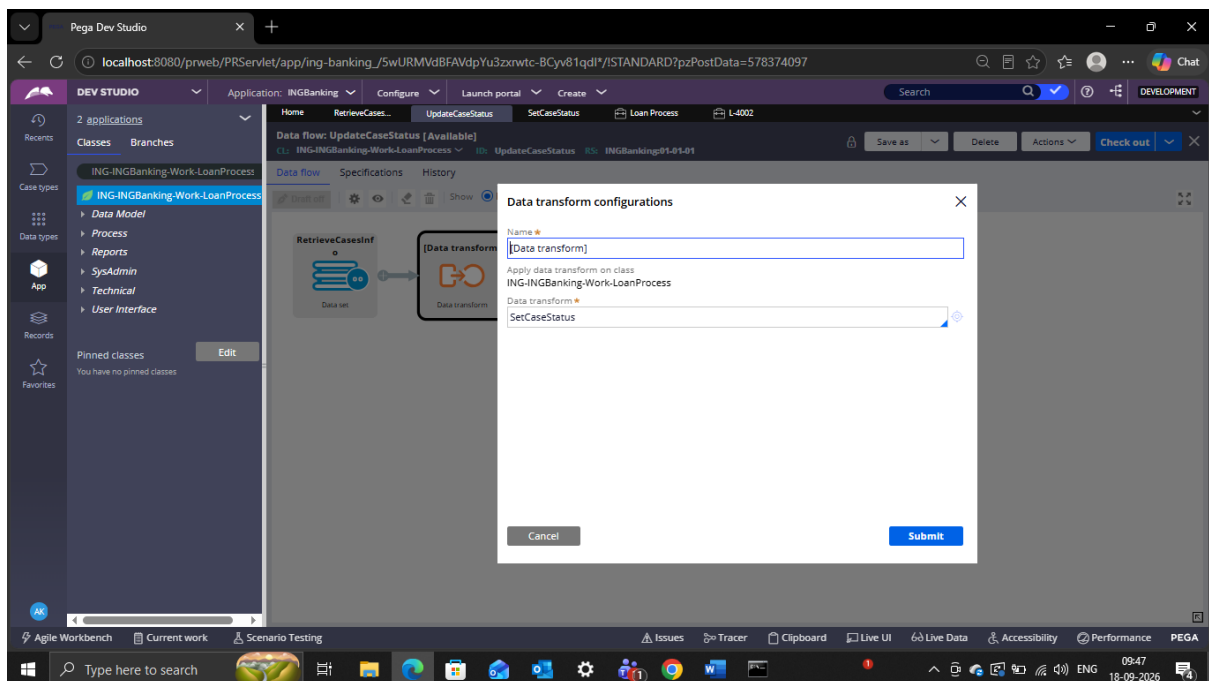

8. Now create dataflow from data model category

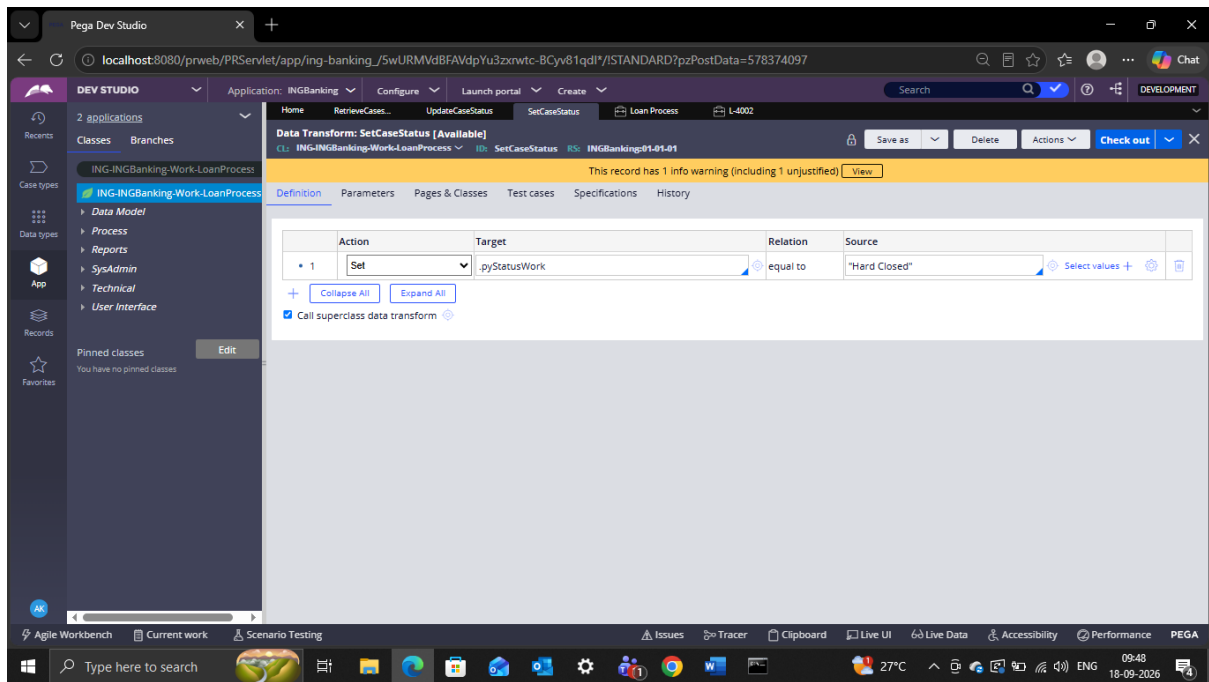

9. In the source configuration, give the dataset which we configured. This helps in retrieving all the cases

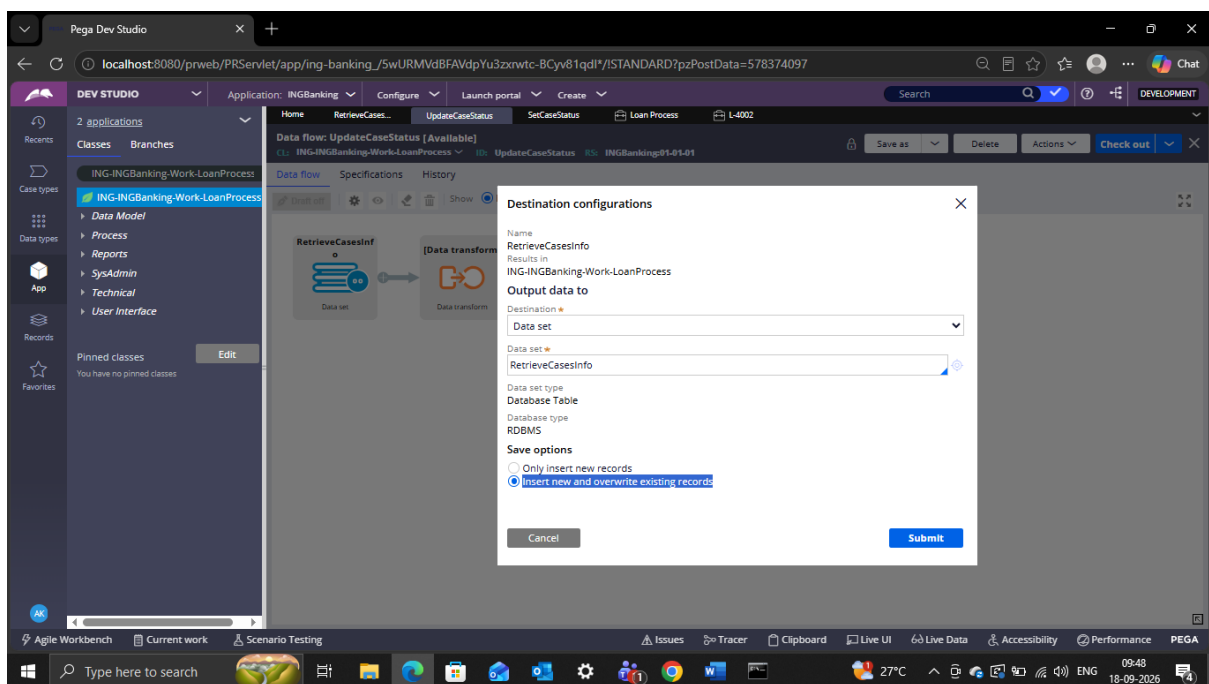

10. Call a data transform and write the logic to update case status

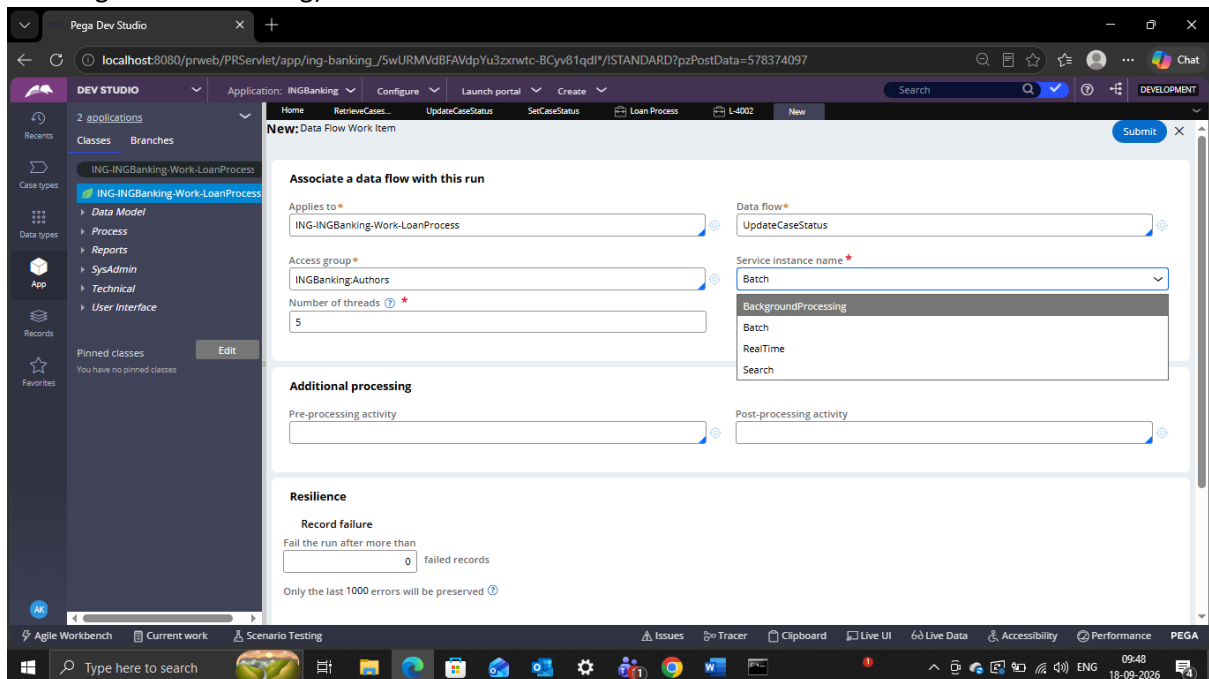

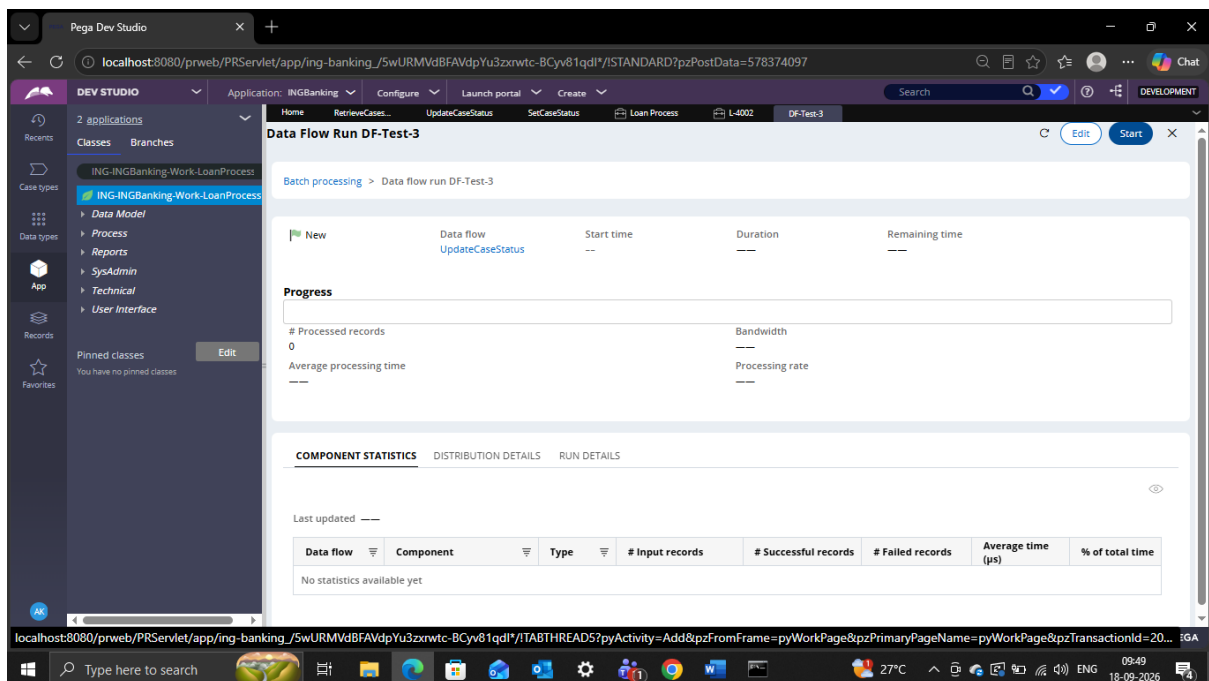

11. In the destination configuration, call the same dataset which we configured earlier and now select “Insert new and overwrite existing records” option. This helps to update existing records.

12. Now run the data flow (As I am using personal edition, so I have selected Service Instance Name as Background Processing)

13. Click on start

Pega Dev Studio

Application: INGBanking | Configure | Launch portal | Create | Search | DEVELOPMENT

Data Flow Run DF-Test-3

Batch processing > Data flow run DF-Test-3

Completed | Data flow: UpdateCaseStatus | Start time: 2026/09/18 00:19:13 | Duration: 5 seconds | Remaining time: ---

Progress

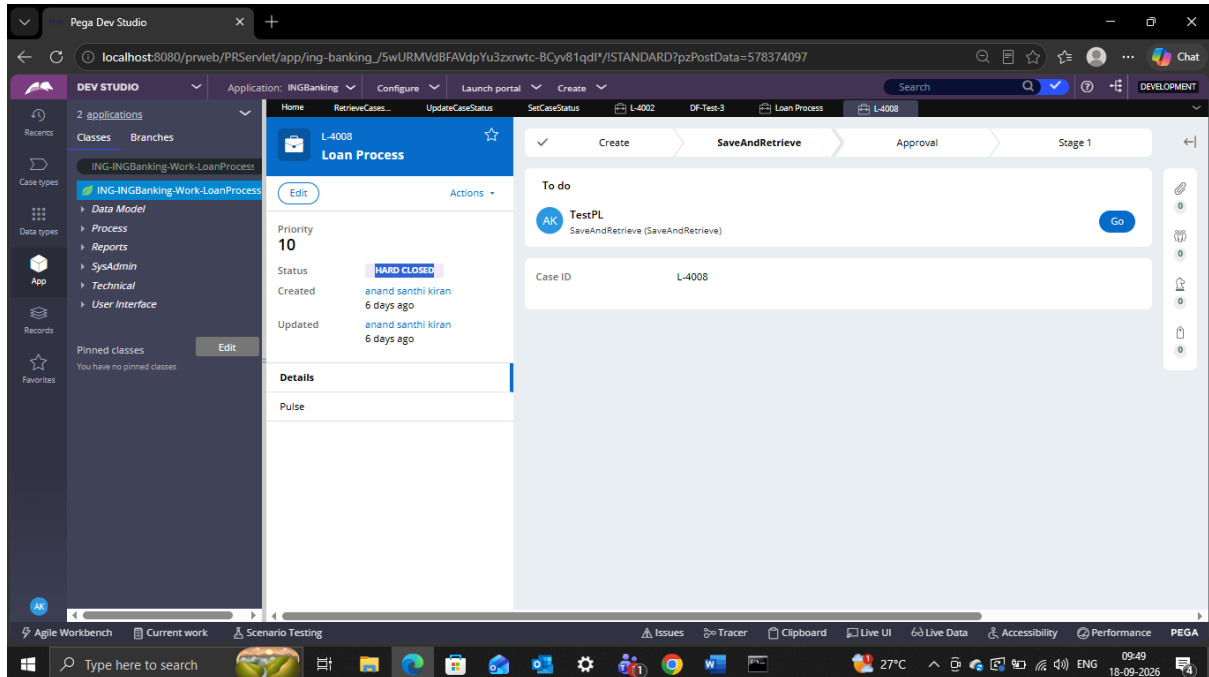

Processed records: 70 | Bandwidth: 137 rec/s
Average processing time: 7293 µs/rec | Processing rate: 13 rec/s

COMPONENT STATISTICS | DISTRIBUTION DETAILS | RUN DETAILS

Last updated: 2026/09/18 12:19:17 AM

Data flow	Component	Type	# Input records	# Successful records	# Failed records	Average time (µs)	% of total time
UpdateCaseStatus	RetrieveCasesInfo	Source	70	70	0	1,227	17
UpdateCaseStatus	[Data transform]	Transform	70	70	0	666	9

15. Open the cases and verify the status

16. If required we can call the dataflow from the activity using “DataFlow-Execute” method and can be configured in the Job Scheduler to avoid manual invoking
